Food Processing Cleaning Chemical Storage & Labelling Inspection Record

Use this inspection to check the physical storage, labelling and container condition of cleaning chemicals and prepared / decanted solutions used at the food-processing site.

Business / site	Chemical storage area	Inspection date	Inspector / reviewer

Chemical storage and container inspection

Product / solution	Label legible / correct	Container / closure condition	Stored away from food	Stored per SDS / site requirements	Prepared / decanted label details	Action / notes

Storage-area review

Leaks, spills, damaged containers or unlabelled chemicals identified	Corrective action / disposal / relabelling / relocation / follow-up

Current labels, SDS and manufacturer directions control

Keep cleaning chemicals away from food and store them as required by the current SDS, manufacturer information and site procedure. Prepared or decanted solutions should be labelled and managed according to the exact product and site requirements.
