

IMPROVE THE FEEL OF FABRICS WITH **FABRIC SOFTENER**

FABRIC SOFTENER is added to the final rinse water in washing machines. Ideal for use in all industrial, commercial and household laundry operations and is suitable for all Australian conditions. It stops the tendency of synthetic garments from clinging to the skin, especially after tumble-drying and stops problems caused by lint in the tumble-dryer.

LET'S TALK WHAT IS FABRIC SOFTENER?

Fabric Softener is a blue, rose-perfumed liquid that softens fabrics, adds bulkiness, neutralises alkaline residues, and leaves a fresh scent. Phosphate-free and non-flammable, it reduces static cling/drying time/lint, prevents skin irritation, revitalises colours, and is ideal for wool, cotton, polyester, all washables in industrial/commercial/household laundries while being recyclable.

Fabric Softener 5L **FAB5**
Fabric Softener 20L **FAB20**

KEY BENEFITS

FABRIC SOFTNESS **BOOST**

Softens fabrics making clothes feel comfortable and fluffy

STATIC **REDUCTION**

Reduces static cling preventing clothes from sticking together

FASTER **DRYING**

Speeds up drying times saving energy in laundry cycles

FRESH SCENT **FINISH**

Fresh fragrance leaving linens smelling clean and pleasant

WHEN & HOW TO USE

UPHOLSTERY:
Dilute FABRIC SOFTENER to 1 in 50 with water.

Pre-test solution on fabric to ensure dyes are colourfast.

Pre-spray the upholstery fabric with CITRUS EXTRA solution, then extract with FABRIC SOFTENER solution.

After each wet pass, make a dry pass.

Dry the fabric with a hair dryer or air blower.
