

POLISH SCRUB-BACK CLEANER WITH **FLORPREP**

Floors sealed with Agar water-based acrylic floor sealers which are due for re-coating. Care must always be taken with timber floors to make sure the floor is not flooded with solution. Over-wetting a timber floor can cause swelling and permanent damage.

LET'S TALK WHAT IS FLORPREP?

FLORPREP is brilliant at what it does – a focussed and highly effective cleaner especially designed for scrubbing back floor sealer films prior to recoating with more polish. Correct use of FLORPREP for repeated re-coating cycles can dramatically extend the period before a full strip is needed, saving on labour, chemicals and waste solutions over the life of the floor.

Florprep 5L **FLP5**
Florprep 20L **FLP20**

KEY BENEFITS

**DIRT & POLISH
REMOVAL**

Removes dirt and discoloured floor polish preparing for fresh recoat layers

**FAST CLEANING
ACTION**

It is fast and effective saving time on maintenance tasks

**LOW FOAM FOR
AUTOSCRUBBERS**

Low foaming suitable for autoscrubbers and buffers

**EASY
RINSING**

Free rinsing leaving no residue after scrubbing

WHEN & HOW TO USE

AUTO-SCRUBBER: Fill the supply tank with a diluted FLORPREP solution and proceed to scrub the floor slowly laying plenty of solution. If the floor needs a heavy scrub, you may lay the solution with the squeegee raised/vacuum off, and then return to scrub again and collect the solution a few minutes later.

Please see PDS for further application instructions.
