

What is Dish Power SL?

DISH POWER SL is a non-caustic high performance industrial strength dishwash detergent that provides excellent cleaning of glassware, crockery and cutlery in institutional dishwashing machines.

Key Benefits

- ✓ Non-caustic
- ✓ Non-corrosive
- ✓ Safe on aluminium
- ✓ Safe on over-glazed china

How Does It Work?

DISH POWER SL is an industrial strength pot and dish washing detergent, designed to be dispensed into dishwashing machines through the Detergent Dispenser Unit. This unit constantly meters the wash water and always maintains the correct detergent concentration. DISH POWER SL controls staining and leaves pans and dishes spotlessly clean.

For Use On...

DISH POWER SL is a high-performance detergent that provides excellent cleaning of aluminium, stainless steel and ceramic trays, pots and pans.

DISH POWER SL is also excellent for soak-tank cleaning of greasy aluminium filters as found in range-hoods and cooking fume extraction systems.

Technical Data

Composition

DISH POWER SL contains alkaline salts for fast removal of foodstuffs and soilage; builders to soften hard water and suspend dissolved minerals, preventing redeposition on glasses and table ware; sequestrants to condition hard water and corrosion inhibitors to prevent attack of metal surfaces. DISH POWER SL is safe to use on aluminium ware and over-glazed china.

Properties

COLOUR – Pale yellow liquid
 ODOUR – None.
 pH = 11.5 – 12.5
 FOAM – Low foam

Environmental Care

DISH POWER SL conforms with all statutory environmental requirements. It is based on effective ingredients selected to perform efficiently so there is no waste or damage. DISH POWER SL is non-flammable and biodegradable. Containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd., significantly reducing plastic usage and waste. They can also be recycled.

Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

First Certified: 30 April 1996 SAI Certificate No.: QEC7358

Application

Dilution Rate

For dishwashing, dilute DISH POWER SL to be between 1 in 1000 (0.1%) and 1 in 250 (0.4%) depending upon the degree of soilage and dishwasher efficiency.

Machine Use

DISH POWER SL is metered and supplied automatically to the wash tank by the Electronic Detergent Control Unit. The unit constantly meters the wash water and always maintains the correct detergent concentration.

Soak Tank Cleaning

To clean trays, filters or utensils by the soak-tank method, begin with a solution of 1 in 100 with water. The concentration should be varied up or down by trial and error to find the most economical concentration that does the job successfully. Soak-times will vary depending on both temperature and the thickness of the film of fat or baked-on food residues.

Disposal Information

1. Used solutions -

Used Solutions of DISH POWER SL should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste. Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rainwater and ultimately lead to the local river system.

Agar Cleaning Systems maintains Safety Data Sheets (SDS) on all its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Agar Cleaning Systems recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.

Product Data Sheet

Product Code: DISP

Issued: July 23, 2025

2. Unused product

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container).

If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the wastewater.

Remember, do not mix different cleaning products together during disposal!

3. Empty packaging

Bottles and drums

Our 5L and 20L bottles and drums are made from HDPE (polyethylene) or PET which can be recycled. You can dispose of these containers via the kerbside collection program or other recycling system. DISH POWER SL containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd, significantly reducing plastic usage and waste.

Cardboard cartons

Used boxes should be flattened and recycled in OCC (old, corrugated cardboard) or mixed wastepaper recycling programs.

Available in: 5L, 15L
