

What is Enyclean?

ENYCLEAN is a heavy duty detergent with environmentally preferable ingredients. It is a fast acting, powerful cleaner for a broad range of cleaning applications.

Key Benefits

- ✓ Attacks dirt quickly and easily
- ✓ Environmentally preferable
- ✓ GECA Certified
- ✓ Is versatile so you can use it wherever you find dirt, oil and grease

How Does It Work?

ENYCLEAN is a concentrated detergent grease-remover. It rips into oil and dirt and lifts it away from the surface. Dirt is suspended and won't redeposit back onto the cleaned area. ENYCLEAN rinses away freely to leave a clean, sparkling surface.

Caution

ENYCLEAN is an alkaline cleaner. It may produce burns if skin or eye contact occurs. Wear eye protection and protective gloves when mixing or using this product.

For Use On...

ENYCLEAN will remove grease, oil, greasy cooking fats, smoke films, ink stains and food spills from floors, equipment, machinery, paintwork, ceramic tiles, quarry tiles, concrete, walls, ovens, barbeques and vinyl upholstery. ENYCLEAN may be used in steam cleaners, autoscrubbers, mop-buckets or by spray-and-wipe.

Note: ENYCLEAN is not suitable for use on sensitive aluminium surfaces. Do not allow the product or its solution to dry on aluminium. Rinse it off immediately if contact occurs.

Technical Data

Properties

COLOUR – Transparent brown liquid
ODOUR – None
pH = 12.8 ± 0.5 undiluted
FOAM – Thick foam with good stability

Environmental Care

ENYCLEAN is a new-generation cleaning liquid formulated for maximum effectiveness with an absolute minimum impact on the environment. Consider the following features: BIODEGRADABLE Ingredients – Rapidly breaks down into acceptable by-products. ENYCLEAN is made from renewable and regrowable surfactants. Detergents are derived from coconut oil. NO toxic, harmful or ecologically-suspect ingredients: no ammonia, EDTA, NTA, butyl glycol, nonyl phenol ethoxylates, chlorine or phthalates.
See page 2 for Disposal Information.

Colour Coding

Product identification is made easy with the Agar Colour Coding system. We have 11 different categories of product that are identified by colour and number. The product itself has this colour. Also, the colour and number are shown:

1. On the bottle label as supplied.
2. On the matching Dispenser Spray Bottle.
3. On the product chart for Colour Coded Cleaning

This system has benefits of reducing the chance of using the wrong product, making compliance and staff training easy, showing that the correct products are being used and providing information about usage, dilution and first aid.

Product	Code Colour	Code Number	Type
ENYCLEAN	Orange	7	Heavy Duty Detergents

Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".
First Certified: 30 April 1996 SAI Certificate No.: QEC7358

Application

- Scrape off or sweep up all loose soil before cleaning.
- Dilute ENYCLEAN as follows:

Floors:

- Damp mopping – dilute to 1 in 66 with water.
- Scrubbing – dilute to 1 in 30.

Walls, paintwork, upholstery:

- Dilute to 1 in 10.

Ovens, BBQs, heavily soiled machinery, smoke stains:

- Dilute to 1 in 5.
- Apply the solution by cloth, mop or sponge and then allow a few minutes dwell-time to break down the soilage. Scrub with scourer pad or nylon brush if necessary.
- Rinse the surface clean with water.

Disposal Information

1. Used solutions -

Used Solutions of ENYCLEAN should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste. Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rainwater and ultimately lead to the local river system. Although ENYCLEAN has a low aquatic toxicity, detergents in general are not good for aquatic wildlife.

2. Unused product

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container). If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the wastewater.

Remember, do not mix different cleaning products together during disposal!

3. Empty packaging

Bottles and drums

Our 5L and 20L bottles and drums are made from HDPE (polyethylene) or PET which can be recycled. You can dispose of these containers via the kerbside collection program or other recycling system. ENYCLEAN containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd, significantly reducing plastic usage and waste.

Cardboard cartons

Our cartons contain a minimum of 70% of recycled cardboard and/or paper. Used boxes should be flattened and recycled in OCC (old, corrugated cardboard) or mixed wastepaper recycling programs.

Available in: 5L, 20L

Dispensing Accessories:

500ml Spray Bottle – Code D07A
Trigger 500ml Bottle Plain Blue/White – Code DTR
Hand Pump for 5L Bottle (30ml/Stroke) – Code DHP30
Hand Pump for 20L Drum (30ml/stroke) – Code DHP20
Tap in Cap 5L – Code DTC5
20L Drum Tap – Code DTAP
