

What is Once Off?

ONCE OFF is specially made for cleaning ceramic, porcelain and quarry tiles that are difficult to clean. Many of these types of tile have tiny holes or pores in the surface. Dirt collects in these holes and gives the tiles a "grey" appearance. Where ordinary detergents are ineffective on such tiles, ONCE OFF is excellent. Its powerful cleaning and penetrating action draws the soil out of these tiles.

Key Benefits

- ✓ Powerful tile cleaner
- ✓ Makes greying tiles clean again
- ✓ Draws out the most stubborn of dirt

How Does It Work?

ONCE OFF is a heavy-duty alkaline detergent which penetrates into the pores of ceramic porcelain and quarry tiles, drawing out the most difficult dirt.

For Use On...

ONCE OFF may also be used to clean concrete, bluestone, sandstone, terracotta and clay or concrete pavers as well as ceramic tiles. It is ideal for use on floors in shopping centres, toilets, shower rooms, kitchens and car parks.

ONCE OFF is designed for use in autoscrubbers, although it may also be used for mopping, scrubbing with single brush rotary machines and pressure washing.

Technical Data

Properties

COLOUR – Transparent, colourless liquid
 ODOUR – Practically odourless
 pH = 13.0 – 14.0
 FOAM – Low-medium foam height, suitable for autoscrubbing, manual scrubbing and mopping

Dangerous Goods Classification

ONCE OFF is a Class 8 corrosive liquid.

U.N. No: 1719	CLASS: 8
PACK GRP: II	HAZCHEM: 2R

Environmental Care

ONCE OFF conforms with all statutory environmental requirements. It is based on ingredients selected so there is no waste or damage. ONCE OFF is biodegradable, non-flammable and chlorine-free. It contains no VOC's (Volatile Organic Compounds) or solvents. Containers will be cleaned and reused if returned to Agar Cleaning Systems significantly reducing plastic usage and waste. They can also be recycled.

Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

First Certified: 30 April 1996 SAI Certificate No.: QEC7358

Application

Caution:

- ONCE OFF can be slippery on smooth tiles. Wear rubber boots with safety treads to avoid slipping. Always DILUTE ONCE OFF BEFORE applying it to floors. Do not allow the solution to come into contact with aluminium, brass, floor polish, marble, terrazzo, wood or carpet. If splashed on any of these surfaces, wash it off immediately.
- Read the Safety Data Sheet before using this product.

Heavy Duty Scrubbing and initial cleans:

- Dilute to 1 in 10 with water. Pour mixture liberally over floor, scrub with a brush or autoscrubber and allow to soak for 10 minutes. Pick up dirty solution and rinse floor.

Light Duty Cleaning:

- Dilute to 1 in 120 with water. This is ½L ONCE OFF in a small autoscrubber, or 1L ONCE OFF in a large autoscrubber.
- NOTE: When autoscrubbing ensure plenty of diluted solution is laid by the autoscrubber to allow satisfactory dissolving and removal of soil from floor. This allows more complete collection of soil by the squeegee and vacuum.
- If using ONCE OFF every day, scrub the floor with only water once per week. This will prevent any accumulation of alkaline residues.
- To speed up the process, ONCE OFF may be applied to the floor at 1 in 20 in water and LEFT TO DISSOLVE THE DIRT for at least 10 minutes. Scrubbing (without squeegee) will assist. After this time, the solution should be picked up by the squeegee and vacuum, with clean water laid onto the floor.
- When maintaining porous tiles, it is essential to use white nylon brushes on the autoscrubber at least 3 times a week to ensure that the grout lines are kept clean, because soil left in the grout lines will allow dirt to spread onto the tiles themselves.

Heavy Duty Cleaning:

- Dilute to 1 in 60 with water. This is 1L ONCE OFF in a small autoscrubber, or 2L ONCE OFF in a large autoscrubber.

Disposal Information

1. Used solutions -

Used Solutions of ONCE OFF should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste. Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rainwater and ultimately lead to the local river system.

2. Unused product

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container).

If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the wastewater.

Remember, do not mix different cleaning products together during disposal!

3. Empty packaging

Bottles and drums

Our 5L and 20L bottles and drums are made from HDPE (polyethylene) or PET which can be recycled. You can dispose of these containers via the kerbside collection program or other recycling system. ONCE OFF containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd, significantly reducing plastic usage and waste.

Cardboard cartons

Used boxes should be flattened and recycled in OCC (old, corrugated cardboard) or mixed wastepaper recycling programs.

Available in: 5L

Agar Cleaning Systems maintains Safety Data Sheets (SDS) on all its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Agar Cleaning Systems recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.
