

What is Portacare Super?

PORTACARE SUPER is a premium blue liquid sanitiser and deodoriser designed as a waste tank additive for portable toilets, sewage holding tanks and sanitary pan systems.

Key Benefits

- ✓ Eliminates unpleasant odours
- ✓ Breaks down sewage and toilet paper
- ✓ Control bacteria levels
- ✓ Will not harm tank seals
- ✓ Contains surfactants to improve waste wash out
- ✓ Concentrated blue colour to mask waste contents

How Does It Work?

PORTACARE SUPER works by altering the biochemical pathway of sewage breakdown to prevent formation of malodours. During sewage breakdown hydrogen sulphides are formed, which are the main malodour forming chemicals. PORTACARE SUPER contains a special ingredient which inhibits the formation of the sulphides and reduces malodour production. Further malodour suppression is achieved with a deodorising agent and a pleasant citrus fragrance. Non-ionic surfactants in PORTACARE SUPER attack and encapsulate the organic matter and separate these substances from the walls of the tank enabling waste contents to be washed out with ease.

PORTACARE SUPER also contains an effective sanitising agent to control bacteria and a concentrated blue colourant for masking waste tank contents.

For Use On...

PORTACARE SUPER is designed to be used in the waste tanks of portable toilets, building site and event toilets and cassette toilets, as well as in bus, caravan/camper and aircraft holding tanks.

Technical Data

Properties

COLOUR – Dark blue liquid
ODOUR – Citrus fragrance
pH = 7.0 – 9.0
FOAM – Medium foam height

Environmental Care

PORTACARE SUPER contains biodegradable surfactants. PORTACARE SUPER conforms with all statutory environmental requirements. It is based on safe ingredients selected to perform efficiently so there is no waste or damage. PORTACARE SUPER containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd., significantly reducing plastic usage and waste. They can also be recycled.

Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

First Certified: 30 April 1996 SAI Certificate No.: QEC7358

Application

If using PORTACARE SUPER for the first time, rinse out tank to remove all traces of other additives.

Portable Toilets and Cassette Toilets:

- Add 80ml PORTACARE SUPER per 10 litres of waste tank capacity. Then add 2 litres of water if a portable toilet or 3 litres water if a cassette toilet. The waste tank should preferably be emptied at least once per week, but if this cannot be done and longer intervals are required, a higher dose of 130-160ml PORTACARE SUPER per 10 litre capacity can be added to the tank.

Bus and Aircraft Holding Tanks:

- Add from 30-60ml of PORTACARE SUPER per 10 litres of waste tank capacity, depending on waste load and discharge intervals.

Caravans, Mobile Homes and RVs:

- Determine whether the vehicle has a cassette toilet or a holding tank, then use appropriate method described above.

Disposal of Containers:

- Do not reuse PORTACARE SUPER containers for storage of food, drinks or animal feedstuffs. Before returning or recycling the bottle or drum, rinse it with water and pour into the waste tank.

Disposal Information

1. Used solutions -

Used Solutions of PORTACARE SUPER should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste. Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rainwater and ultimately lead to the local river system.

Agar Cleaning Systems maintains Safety Data Sheets (SDS) on all its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Agar Cleaning Systems recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.

Product Data Sheet

Product Code: PORT

Issued: June 18, 2025

2. Unused product

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container).

If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the wastewater.

Remember, do not mix different cleaning products together during disposal!

3. Empty packaging

Bottles and drums

Our 5L and 20L bottles and drums are made from HDPE (polyethylene) or PET which can be recycled. You can dispose of these containers via the kerbside collection program or other recycling system. PORTACARE SUPER containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd, significantly reducing plastic usage and waste.

Cardboard cartons

Used boxes should be flattened and recycled in OCC (old, corrugated cardboard) or mixed wastepaper recycling programs.

Available in: 5L, 20L
